

200 IN PERIL ON BURNING STEAMER

BOAT STRIKES SHORE AND TIPS OVER—MANY KNOWN TO BE DROWNED—FIRE STARTS AND COMMUNICATION IS CUT OFF.

LACROSSE, Wis., July 12.—The steamer Quincy of the Diamond Jo line struck a boat in the darkness near Trempealeau, Wis., at 10:30 last night turned half over and then caught fire. It is believed that the majority were saved, although several are reported drowned.

At 11:20 o'clock this morning a belated train brought sixty passengers who were on the boat to this city. Accounts given by them of the disaster do not include positive statements as to drownings, but it is believed comparatively few met death.

All communication with the village of Trempealeau is cut off and information relative to the accident to the steamer is obtainable only through the stories told by passengers and meager reports received at the railroad offices.

At about 10:30 o'clock the steamer plying up river struck a bank. At the time, it is said the boat carried no searchlight. One passenger says he saw a babe washed overboard from its mother's arms. The boat is sinking, though not in deep water.

GEO. GRAHAM IS PARDONED

The board of pardons in session today passed upon the following applications:

Harry Butts, assault to commit murder, deferred to Aug 13; John Buster, murder, denied; Chas Canby burglary, deferred to Aug 13; Cachtie Signauer, murder, denied; Geo Graham, jail breaking, pardoned; Chas. O'Connor, burglary, committed to four years.

In the absence of Atty Woodburn, all cases in which he is interested were deferred until Aug 13. New evidence is to be presented in the cases of Sabin and Christie, under consideration.

MACKAY DONATES \$100,000

BERKELEY, Cal., July 12.—Wishing to honor the memory of John W. Mackay Jr., his brother, Clarence H. Mackay, and his mother, have donated \$100,000 to the University of California for the establishing of a professorship of electrical engineering. The annual income from the money will be applied to the payment of a professor's salary and the expenses and maintenance of the department, the original fund to be kept intact in perpetuity.

MRS. J. MAYO IS DEAD

Mrs. J. R. Mayo, of Markleville died at her home in that city Monday evening. She leaves four children and her husband to mourn her loss. Mrs. Mayo was closely related to many of the best families of that section, and was a woman of most estimable character.

JUPITER PLUVIUS GETS BUSY

A dark cloud settled over the city this afternoon and in a few moments rain drops fell, cooling the atmosphere and laying the dust in a most satisfactory manner.

BANK DIRECTORS MEET

G. W. Mapes, C. T. Bender, and T. B. Riekey are in the city today, to attend a directors meeting of the State Bank & Trust Co.

BRYANT CASE TO CLOSE FRIDAY

RENO, July 12.—Taking of testimony in the Snorman Bryant case will be completed this evening, and argument probably will take up the greater part of Friday. It is believed the jury will get the case some time tomorrow afternoon.

(From the Journal)

The impression of Dr. Heppner's testimony at the trial of Snorman Bryant for the killing of Daniel Casey on the jury yesterday was probably affected by the outcome of the case more than anything else. In substance the doctor stated that judging from the condition of the defendant, Casey must have participated in the fight with Bryant before the cuts in the former's abdomen were inflicted. In Casey's dying statement he said that Bryant attacked him from the back and slashed his intestines tearfully from behind. According to the physician's words this would be impossible.

"The sympathetic nervous system is not subject to the will," said Dr. Heppner. "Casey could not have beaten the defendant over the head with a rock, as he stated on his death bed he did, after such wounds had been inflicted by Bryant. Even had Casey willed, the paralysis of his nervous system by the cuts in his abdomen would have taken the fight out of him. For instance when Corbett was knocked out by a solar plexus blow, he tried repeatedly to rise from that mat and again face his opponent but the nervous system would not respond. So it was with Casey."

"Then I judge it untrue that the defendant succeeded in injuring Casey before the latter resisted. The wounds on Casey must have been inflicted after a fight between the two, as the defendant avers."

This would, it seems, neutralize the effect of the dying man's statement that the alleged murderer sneaked up behind Casey and stabbed him. The whole testimony, then, of the murdered man received a contradiction by the resultant examination of the doctor who attended the alleged murderer after Casey's death.

During the course of the trial yesterday Mrs. Casey showed the strain under which she suffers. Careworn and ready to collapse when the court opened, the window bore the testimony until her husband's slayer took the stand and told of the killing. She fainted then, and was carried from the court by the attendants.

The prosecution closed its case by introducing the testimony of the dying man. By this afternoon the defense will probably have closed its attempt to save Bryant and by noon the decision will perhaps be left to the jury.

BIG DIVORCE CASE

Judge Murphy went to Genoa this morning to try the celebrated Spooner divorce case. M. E. Spooner sues Clara Spooner for divorce on statutory grounds, and as there is a good deal of property to be divided, the contestants have retained some of the best legal talent in the state to assist in trial of the case. U. S. Dist. Atty. Platt represents the defendant, and has as counsel C. H. Fairall one of the attorneys in the now famous Le Doux case, of Stockton Cal.

Mrs. Kossman, mother-in-law of Hon. J. G. McCarthy, former State Printer of Nevada, died in Reno this afternoon. Mrs. Kossman was an old resident of the Comstock in the palmy days, and was quite well known in Carson City.

Mrs. R. E. Kelley, is visiting her sister Mrs. T. R. Hofer.

FOR SALE—A good second hand bath tub for sale cheap. Formerly \$17.50, now \$10. Inquire this office.

PLANS FOR NEW J. W. MACKAY BUILDING

WILL ADORN THE SITE OF THE UNIVERSITY—MAY BE COMPLETED THIS WINTER—STATUE TO FORM PART OF ARCHITECTURAL PICTURE

The last work of Stanford White, the drawings of the Mackay mining building for the University, was received by President Stubbs yesterday; before the end of the week the plans will be submitted to the Board of Regents for approval; and it is expected that August 10th the contract will be let and the construction of what is to be the most edifice in the State will then be rushed to completion. Bids will be received until July 15th. The gift of Clarence Mackay will be lasting monument to the name of the Nevada miner and pioneer.

The Mackay mining building will be constructed of light pink rhyolite stone from Carson City. The architecture is Grecian of the age of Pericles. A wide portico with Dorian columns will beautify the front, and leading to it will be massive stone steps. The structure will be rectangular in shape and in the rear will be added two ell's extending back and leaving a court to be decorated in a manner becoming the general plans.

According to the drawings, the main edifice is to be two stories in height, while the wings will be but one story. The structure will be 114 feet, in width with a depth of fifty feet. The wings will be approximately eighty-five feet deep with a width of thirty-five feet. The porticos in the front of the edifice will be forty feet wide.

Stanford White before his death suggested a location for the new building at the north end of a rectangle of which the Morrill Hall will be the axis. The structure will be situated, then, at the end of this proposed rectangle near the present gymnasium and facing south. Extending along the sides of this rectangle are to be driveways and in front of the mining building will be an open space where the Gutzen Borgium statue of John W. Mackay will be seated.

Dr. Stubbs asserts that plans for the new library are being drawn and that it will be situated in the rear of the Morrill Hall, being the second structure to be located according to the suggestions of Stanford White. Then, as fast as the remaining edifices are built they will be situated to carry out the rectangular scheme.

The present mining building will probably be used for an experiment station. Here the original investigations of the students of agriculture will be held, the government having arranged for an appropriation of \$15,000 a year to support this, and the state legislature having added an additional \$7,000.

The money for the Mackay structure is now in a New York bank and it can be used immediately. If the intentions of President Stubbs are fulfilled the work on a Greater University of Nevada will soon be under way and the reputation of this school as one of the greatest mining college in the world will be maintained. As fast as the funds are available the construction of several other buildings will be undertaken.

In time the sloping hill in the front of the college buildings will be terraced, and a landscape gardener will be employed to beautify the grounds. Trees will be planted along the driveways and when the work is completed the University of Nevada will, indeed be a credit to the state.

THIS IS AN AD FOR THIS CITY

The Appeal told yesterday of the many inquiries that come daily from eastern firms for information as to new installations of mining and agricultural machinery.

Carson City, and the business men of Carson City, are able to supply this sort of merchandise on short notice. It is a fact that this city is as well equipped to handle large orders for machinery, and mining supplies as any other on the coast.

One of the best machine shops in the country is in active operation here. The only adequate foundry in the state is here, ready for business, and it can cast light or heavy hardware, and machine parts with equal facility.

When it comes to general repairs on mining machinery and stamp mills, building or assembling of hoists and engines, this shop has few equals on the coast, and none in the state approach it for facilities and adequate tools.

From the heavier work to the lines known as "shelf hardware" the merchants of the city can supply all wants. There are three or four wholesalers in Carson City that make a specialty of mining supplies both light and heavy, to say nothing of general camp goods for outfitting a new organization for campaign in the field.

Prospecting parties may be fitted out in Carson City with every thing needed for trips in the desert, and for work on a ledge when one is found. Iron work, special construction to meet local conditions, food supplies, everything needed in either mining or agricultural exploitation can be had in this city as cheap as in any other city in the state.

As for transportation and means of access to any and all camps and valleys in the western part of the state, it is proved that all roads lead to Carson. This applies not only to wagon and stage lines, wood trails and mining roads, but railroads as well. Every camp south, now reached by railroad, can be reached easily from this city.

Freight rates and passenger fares are as cheap to and from here as in any part of the state. The service is better than on any other railroads or stage routes in the state.

The merchants of this city carry large stocks and make close prices. The machine work may be done at actual cost of material and time employed on the piece of work.

The Appeal will answer any inquiries as to special lines, or special business houses from any person desiring such information.

BIG COPPER SHOWING IN HUNTOON VALLEY MINE

James Andrain has returned from Huntoon Valley where he went to sample the Sunset mine in which a number of Carson City men are interested.

He brought some fine looking galena ore and some good copper samples with him, and assays of the copper show value in gold, silver and copper as high as \$107 the ton. The gold and silver together amount to about \$5 and the balance is copper. The galena ore is almost pure and the extent of the stranger or ledge in which it is found is not known.

Huntoon Valley mines are being opened up as fast as possible, and the Western Mines Co is putting 30 men to work in its mines. The company is made up of Oakland, Cal. men and the new manager is a man named Harry of South Africa.

Andrain says that the Martin well is now down 25 feet and that it contains four feet of water that runs in too fast for an ordinary pump to exhaust.

5 MEET DEATH IN COLLISION

TROLLEY TRAINS CRASH AND SCORES ARE HURT—TERRIFIC SPEED SPELLED DEATH FOR SOME AND FIGHTFUL INJURY FOR OTHERS.

BUFFALO, July 12.—A train of trolley cars westbound from Lockport, on the lines of the International railway company, ran into an open switch at a sliding just east of Martinsville, and crashed into a trolley freight motor, and a train of seven cars which were lying on the siding waiting for the passenger train to go by. Five passengers were killed outright and a score injured, some of whom may die.

The passenger cars were going at a high rate of speed, when the accident occurred and the impact was terrific. The foremost car was utterly demolished. The wedge shaped end of the freight motor cut it in half and the rear car completed the work of destruction. The rear car was badly stove in, in front but remained on the tracks.

BY WIRE

RENO, July 12.—The Barber Asphalt has bought the tailings of the old English mill and will use them for street paving. The tailings run from \$5 to \$10 a ton in gold and silver.

RENO, July 12.—It is reported that the Rump Silver party will hold a convention here the same day the regular party holds its convention and that Dick Cavanagh will be the candidate for governor.

J. F. Loder, a metallurgist of Colorado has made a successful test of smelting ore by means of oil for fuel. It is stated that a 200 ton smelter is to be built immediately, location not known.

Dick Tobin, late of Carson City and of Virginia City, arrived in Reno today from Boston on a visit home.

THESE ARE SHORT ONES

Geo. Wall of Austin, is in the city on business.

Pearl Webb, late of Churchill county passed through this morning en route to Bridgeport with his family. He said that Churchill county is becoming as is no other county in the state of Nevada.

Mrs. H. H. Clark, of Reno is at the Arlington hotel for a brief stay.

H. R. Nichols, with J. R. Van Evera, of Godfield, left in an auto this afternoon for the Golden Gate mine. Hal Lemmon steers the machine on the 200 mile trip.

T. R. Hofer is on his regular monthly trip to Tonah.

Wm. Hy Doane came up from Keeler last night for a visit in this city the scene of years of his life. His daughter-in-law, Mrs. Garfield Doane, who has been visiting him at Keeler returned with him. Garfield is expected shortly for a few weeks visit and vacation at home.

Vacations of postal employees have started. Miss Kaiser left last night for three weeks in California.

A new line of Eastman Kodaks has arrived at Kitzmeyer's drug store. Just the thing for campers and to take on a vacation trip.

GREAT METHODIST DIVINE ATTACKS "SCIENCE"

LOS ANGELES, July 12.—Rev. Robt McIntyre, one of the most noted divines of Methodism delivered a lecture Sunday evening on "Methodism and Socialism," in which he made a most scathing attack on Christian Science.

He calls Mrs. Eddy a religious "quack."

He compounds the challenge by dubbing her "the Lydia Pinkham of religion" and by referring to her record of marriage and divorce.

Many other bitter accusations are flung by the Methodist preacher at the door of the science founder.

The attack came Sunday evening, when Dr. McIntyre was speaking on "Methodism and Socialism."

The speaker approved of the expressed aims of socialism, but condemned its methods, declaring that the Catholic and Protestant churches, farmers and business interests are convinced of the error of the scientist party's ways.

Then Dr. McIntyre attacked Christian Science. "The only modern movement for which I have no respect," he said, "is a so-called religious society started by an old woman in New England who has been many times married and divorced. Her names, so far as I have been able to assemble them are Mother Mrs. Mary Glover Baker Eddy."

"I may have missed a few of this collection, and if I have I will make amends in my next. She is the Lydia Pinkham of the religious world—a mere quack."

"Every time I mention this strange fad I receive an avalanche of what they call Christian Science literature. Lately I have been overwhelmed with publications concerning their new temple in Boston, which they tell us cost \$2,000,000 or \$3,000,000. I am not greatly impressed by costly temples. They belong to paganism and Judaism, and have no part in Christianity."

"I would not walk around a block to see a \$2,000,000 temple. But I would walk across a California county to see a Christian Science orphanage, or Old Folks' home, or Door of Hope for sinful women or rescue mission for homeless men, or any agency for doing good to the sorrowful and needy."

"But I am told that I will look for these things in vain, from this seat; for they teach that these people who suffer are not really poor—they only think they are poor. The sick are not really sick—their senses render false reports on this subject. The aged are not really old and feeble—it is a delusion of mortal mind."

"And Mother Eddyism will do nothing to help them, but will build more \$2,000,000 temples for amusements to be filled with people who rustle in silks and boast how elegant and well-bred and high-toned their congregations are."

"It has been part of my business for 28 years to study the various counterfeits of Christianity which have sprung up along the highways of the centuries, and it is my conviction that the shabbiest, paltriest fake that ever wore the name of Christianity is that which is now known as Mother Eddyism."

T. F. Rowland, has been appointed to the office of assistant superintendent of the U. S. L. lines in Nevada, vice Shaughnessy, resigned.

Miss Jessie Schulz, will go to independence lake on a vacation trip.

An additional clerk, in the person of James Grant, has been allowed the Carson City postoffice.

A. C. Hargrove, a fireman on the Tonopah railroad was hauled out to Walley Springs today on a stretcher, suffering from rheumatism.
